3.Operation

3.1.Registration

The software (iOS version) can be downloaded from the app store, and the Android version can be downloaded from the application store of Google play, Yingyongbao, Baidu, Ali, 360, Huawei, and Xiaomi.

3.2. Connect lock to the phone

- 1) please scan the QR code to download the app
- 2) You can also search for TTLock in the APP store(Google Play)to download
- 4) Register a new account (phone number or email) or login with an existing account.
- 5) Touch the lock screen to light, click "+ Add Lock"
- 6) The lock nearby will appear on the phone screen, Click "+"
- 7) Re-name the lock
- 8) The lock added successfully

Two side-by-side screenshots of the TTLock app. The left screen is the 'Register' page with fields for 'Phone' or 'Email', 'Country/Region' (set to American Samoa+1684), 'Enter your Phone number', 'Password between 6-20 chars', 'Confirm Password', and 'Verification Code' with a 'Get Code' button. The right screen is the 'Login' page with a 'Phone' field containing '18520265893', a password field, and a 'Login' button. Both screens have a blue hand icon at the top.

TTlock users can register the account by mobile phone and Email which currently support 200 countries and regions on the world. The verification code will be sent to user's mobile phone or email, and the registration will be successful after the verification.

3.3.Add locks

3.3.1 Add locks By Bluetooth

TTLock supports multiple types of lock devices. The lock needs to be added by the app after entering the add mode. Generally, a lock that has not been added, as long as the lock keyboard is touched, it will enter the add mode. The default password is 123456 if not added by the phone

3.3.2 Connect WiFi

There are two ways to connect the lock with your WiFi.

1. When you connect to the lock through the APP, you can choose to connect on 2.4G WIFI what you need.

2. Click on the "  Settings " as shown in figure, you can set up the WiFi setting → Select " WiFi " → Click on the WiFi Name, chose the 2.4Gz WiFi what you need. (If you need to change your WiFi, this step will help you.)

Turn off the "Power saving mode": Keep WiFi connected at all times
Remote unlocking can be controlled and received messages will be reported

Turn on the "Power saving mode": The WiFi is connected only when a message is reported. The lock cannot be opened remotely and only the reported message can be receive

3.4. User Management

3.4.1. Bluetooth management

Make sure there is no problem with Bluetooth communication. After connecting the phone to the door lock as above, Click "  "to unlock.(the phone is within 5meters from the door lock)

3.4.2. Setting Passcode

Passcodes are also a way to unlock. After entering the passcode on the locked keyboard, press the unlock button in the lower right corner to unlock. Passcodes are divided into permanent, time-limited, single, clear, cycle, and custom.(You can share the Passcode to other user via WeChat、SMS、Email、Messenger、WhatsApp)

3.4.3. Send e-Key

Click on the "  " as shown in figure, you can send the eKey to other users of TTlock to authorize the unlock(the receiver must be download the APP and set up an account)→ Select e-key format (Timed, permanent, One-time, Recurring) → Enter recipient's account of TTlock,set the name and effective time of the eKey, Can choose to allow remote unlocking or disallowing, authorized administrator or not authorized, as shown in figure →Send→The recipient's account has Bluetooth unlock permission

3.4.4.Add card

Supports opening doors through various IC cards. Before an IC card is used to open the door, it needs to be added first. The adding process needs to be performed by the app beside the lock.The validity period of the IC can be set, it can be permanent, or it can be limited in time.

3.4.5. Add fingerprint

The premise that a fingerprint can be used to open a door is that it needs to be added first. The adding process needs to be performed by the APP beside the lock. The fingerprint expiration data can be set, it can be permanent, or it can be limited. After setting ,you can modify its validity period.

3.4.6. e-Key management

Click "  " The manager can delete ekey, reset ekey, send and adjust the ekey, meanwhile he can search the lock record.

3.4.7. Passcode management

Click "  ".All generated passwords can be viewed and managed in the password management module. This includes a password change, password deletion, password reset, and password unlock record.

3.4.8.Unlock records

Click "  "you can query your unlock record as shown in figure
